Dear DIBC Members,

The Joint Directed Energy Transition Office (JDETO) has released a solicitation to establish the Joint Directed Energy Consortium (JDEC). This consortium-model Other Transaction Agreement (OTA) is intended to support innovation and deliver unique advantages of directed energy technologies to the warfighter for missions across all domains in which JDETO operates.

JDETO is requesting a consortium be built to address directed energy technologies, including high energy lasers and microwave technologies. In preparing to respond to this solicitation, Advanced Technology International (ATI) is reaching out to current members of ATI-managed consortia. ATI's goal is to build a premier consortium of traditional and non-traditional government contractors, small and large businesses, for-profit and not-for-profit entities, and academic organizations to perform research and prototyping efforts in support of JDETO.

There is **no cost** for your organization to join the consortium, nor do we require exclusivity; simply click the link below to access the simplified JDEC Membership Application. The link also includes the related Directed Energy Technology Areas, the Consortium Membership Agreement, and a link to the JDETO solicitation.

Learn more and join here: <https://www.ati.org/jdec/>

Should you have any questions, please feel free to contact the ATI team at JDEC@ati.org.

V/r,

DIBC Consortium Management Organization
