Dear DIBC Members,

The Office of Secretary of Defense (OSD) Manufacturing Technology Program (ManTech) has released a solicitation for a Consortium Manager for the Revolutionary Fibers and Textiles Consortium (RFTC). This consortium-model Other Transaction Agreement (OTA) seeks to create a research and prototyping ecosystem comprised of government, industry and academia to collaborate, advance and scale critical manufacturing processes for revolutionary fibers and textiles.

OSD ManTech is requesting a consortium to address fibers and textiles technologies. In preparing to respond to this solicitation, Advanced Technology International (ATI) is reaching out to current ATI partners. ATI's goal is to build a premier consortium of traditional and non-traditional government contractors, small and large businesses, for-profit and not-for-profit entities, and academic organizations to perform research and prototyping efforts in support of OSD ManTech.

There is **no cost** for your organization to join the consortium, nor do we require exclusivity; simply click the link below to access the simplified RFTC Membership Application. The link also includes the related Fibers and Textiles Technology Areas, the Consortium Membership Agreement, and a link to the RFTC solicitation.
