Member Submission Form

Purpose

The Defense Manufacturing Readiness Exercise (DMRE) is a phased effort to identify and better understand manufacturing capabilities, facilities, production roles, design capabilities, and other manufacturing-readiness opportunities that may contribute to future defense production capacity.

This questionnaire helps the Government understand your organization's capabilities, facilities, products, services, capacity, technical expertise, and potential production roles.

You do not need prior defense experience to participate.

Facility Submission Guidance

Each submission should represent a single facility.

If your organization wishes to nominate multiple facilities, submit a separate questionnaire for each facility.

Company-level information may be repeated across submissions. Facility-specific responses should reflect only the facility identified in this questionnaire.

Facilities may be evaluated independently for:

- Production-role suitability
- Discovery participation
- Prototype participation
- Readiness assessment
- CRMN-related disposition

This questionnaire is:

- Not a proposal
- Not a request for pricing
- Not a commitment to future work
- Not a source selection

Please answer based on your current operations.

The Government is not requesting:

- Proprietary technical data
- Trade secrets
- Customer-sensitive information
- Controlled Unclassified Information (CUI)
- Export-controlled information
- Detailed pricing

Estimated completion time: 10–15 minutes.
